

ControlByNet Joins Forces with Colosseum Online Inc to Offer Cloud Video Surveillance to Small Businesses

ATLANTA, GA (PRWEB) JUNE 29, 2016 - [ControlByNet](#), a leader in cloud-based hosted video security surveillance solutions, announced today that they have joined forces with Colosseum Online Inc., a Toronto-based internet and data center service provider, to offer Colosseum's customers a cloud-based video surveillance solution.

"By leveraging ControlByNet's i-flashback software, we can instantly add cloud video surveillance to our current offerings for our small business customers," said Jean Crescenzi, chief technology officer at Colosseum Online Inc. "We are also utilizing ControlByNet's guard station software, ip-LookOUT, to provide a video verification service to our small business clients as an added feature."

"ControlByNet's video surveillance software provides another recurring revenue stream option for Colosseum Online Inc. Moving into cloud video is very simple with our software and any size organization can do it," said Ryan Strange, president of ControlByNet LLC. "Even if cloud video isn't your key business, hosting a few clients can provide additional recurring revenue and offering it to current customers adds a nice addition to your bottom line."

About Colosseum Online Inc. ([Colosseum.com](#))

Colosseum Online Inc. is a Toronto Canada full service Internet provider. It offers customers primary services such as online backups, colocation, web hosting, dedicated high speed Internet access and additional cloud services. About ControlByNet ([ControlByNet.com](#))

ControlByNet provides the most flexible Cloud and managed IP-based surveillance solution on the market. ControlByNet works with integrators and resellers to create recurring revenue for them and provide the innovative Cloud Plus™ security surveillance software to their customers. By leveraging Software as a Service (SaaS), CBN's solution integrates seamlessly across its products creating limitless installation scenarios. The hierarchal nature of the software allows a single log-in across multiple accounts hosted on multiple servers – anywhere on the Internet. While the i-flashback interface is as simple to use as a nanny cam, both versions of the software are sophisticated enough to manage thousands of remote cameras from a single browser interface. Cloud Plus™ is fully html 5.0 browser-compliant, meaning the web interface operates on all current browsers including all mobile devices (iPad, iPhone, Android, Chrome, Firefox and Safari).
